ALI AMEER

Security & AI-Oriented IT Instructor | Computer Science · Cybersecurity · Python · AI/ML

LinkedIn: linkedin.com/in/ali-ameer-811786302 • GitHub: github.com/ameer-18-star • Portfolio: ameer-18-star.github.io/Portfolio

SUMMARY

IT and computer science instructor with 3+ years in teaching, technical training and lab administration. Teach Computer Science, Python, AI, cybersecurity and IT support to Matric and Intermediate students at two institutions, and run VMSOIT, a CompTIA A+ education channel with **25M+ organic views**. Hands-on security background: **30 of 33** graded tasks (ranked **14th**) in Parry Security's Red Teaming internship and a 4-week web application assessment at VortexTech. Build documented teaching projects in Python, including an encrypted password manager (130 tests) and a fraud-detection ML pipeline. Seeking an IT instructor role that teaches security and AI.

TEACHING & TRAINING EXPERIENCE

Computer Science & ICT Instructor Officer's Science Academy | Grammar Model School Academy *2026 – Present*

- Teach Python, AI, machine learning, data science, IT support and cybersecurity to Matric (9th–10th) and Intermediate (11th–12th) students, using industry examples over textbook theory.

IT & Computer Science Instructor | Sir Syed Scholars Inn *Jan 2025 – Present*

- Teach digital literacy, programming, networking, operating systems and cybersecurity to higher-secondary students; design lesson plans, practical exercises and assessments aligned with curriculum standards.
- Run hands-on labs in networking, cybersecurity and Windows/Linux; explain concepts through storytelling and the CLEAR technique.

Founder & IT Trainer | VMSOIT (YouTube, Instagram, blog) *Apr 2024 – Present*

- Wrote and teach the Mastering CompTIA A+ (V15) course on YouTube for beginners: hardware, networking, operating systems, security and troubleshooting.
- Reached **25M+ organic views** (15M Instagram, 10M YouTube) and **35K+ site visits** with no paid advertising; write articles, scripts and course material on cybersecurity, networking, AI and IT support.

Computer Lab Administrator & Technical Support | VMSOIT *Feb 2022 – Apr 2023*

- Ran a **50-workstation** lab, resolved hardware, software and network faults, and taught non-technical users safe lab operation.

SECURITY EXPERIENCE (HANDS-ON)

Red Teaming Track Intern | Parry Security (remote) *2026*

- Completed **30 of 33** graded tasks for **720 points**; ranked **14th** on the cohort leaderboard. Labs covered Active Directory, Linux privilege escalation, web security, wireless, OSINT and penetration-test reporting.

Cybersecurity Intern, Advanced Track | VortexTech (remote) *4 weeks*

- Delivered **4 of 4 weeks** (100% completion): web application assessment of OWASP Juice Shop (lab target) with Burp Suite, SQLMap and Nmap, OWASP Top 5 research and a NIST-aligned incident response plan.

TEACHING-READY PROJECTS

Fraud-detection ML pipeline *(Python)* GitHub — Anomaly detection (Isolation Forest, LOF, One-Class SVM) and supervised models (Random Forest, Gradient Boosting, XGBoost) with SMOTE for class imbalance on a 284,807-transaction dataset; simulated SOC alert triage. AI-assisted.

VaultKeeper *(Python, Fernet)* GitHub — Encrypted password manager teaching key derivation, encryption and password auditing; **130 passing tests**. AI-assisted.

NetSniff *(Python, Scapy)* GitHub — Packet sniffer that shows how Ethernet, IP, TCP, DNS and HTTP packets are built; captures compared against Wireshark. AI-assisted.

Learning Management System *(PHP, MySQL)* GitHub — GCUF final-year project: course management, user roles, QA testing and a formal thesis, presented to academic stakeholders.

SKILLS

Teaching: Lesson planning · hands-on labs · assessment design · curriculum alignment · storytelling and CLEAR technique · video course production · YouTube SEO

Security: Nmap · Burp Suite · SQLMap · Wireshark · Kali Linux · OWASP Top 10 · MITRE ATT&CK · TCP/IP · Linux CLI · cryptography basics

AI & programming: Python · anomaly detection · supervised learning · prompt engineering · AI-assisted development · JavaScript · SQL · PHP/MySQL · Git/GitHub

IT support: Windows and Linux administration · help desk · troubleshooting · remote support · Cisco Packet Tracer

EDUCATION & CERTIFICATIONS

BS Information Technology | GC University Faisalabad (GCUF) *2021 – 2025 | CGPA 3.5/4.0*

Completed: Google Cybersecurity Professional Certificate · Cisco IT Support Specialist Career Path · Cisco Python Essentials 1 · TCM Security: Practical Help Desk, Practical Security Fundamentals, Linux 100, Programming 100 and AI 100 Fundamentals

In progress: EC-Council CEH v13 (exam date TBD) · Cisco Ethical Hacker Path (60% complete)
